Service

Service

A brief service overview

Types of treatment

This is a brief, detailed account of the services which are offered in my surgery.
Detailed information about my services:

Implants

- Pure titanium, low-risk implants from Straumann, the renowned Swiss company.
- ie. Insertion of artificial teeth to avoid removable prosthetics, but also as substitution of a single piece.

Dental preservation

- Composite fillings, porcelain (inlay), gold (inlay)
- Treatment of the root with the most modern equipment.

Prosthesis

- Bridges with porcelain covering (cemented)
- Porcelain in crowns of a single piece or in bridges in front teeth.
- Dental prosthesis combined with biotolerable material.
- Total dental prosthesis (also of hypoallergenic

material)
- Dental prosthesis on telescopic base

Cosmetic surgery

- Bleaching
- Change of dental profile (LUMINEERS)
- Indirect veneers (porcelain covering)

Prevention

- Advice on dental care
- Food advice
- Professional oral cleaning (by my dental hygenist)

Functional therapy

- Preparation of splint taking into account functional manual analysis
- Treatment of diseases of the jaw joints and muscles
- In necessary cases I cooperate with specialists in the field of jaw orthopedics.
